

2020-2022 CORE: INTENT TO TRANSFER/ADD/REDUCE SCHOOL SITES

St. Louis County Children's Service Fund (CSF) understands that throughout a Core contract period it may be appropriate to add or terminate CSF-funded service resources among school sites. CSF has created the following process for partner agencies to notify CSF staff with an intent to change school sites as listed in the agency's contract.

This process should be completed when an agency seeks to add or remove school sites where CSF-funded services are provided on a regularly scheduled, [part-time or full-time basis](#) at the named school site. Services provided on a one-time or occasional basis, such as presentations, do not need to follow this procedure. If you have questions about whether this process pertains to your programming, please reach out to your assigned program officer. Site changes will not impact a program's award amount.

CSF provides the following expectations to be completed before any anticipated site changes take place:

- **Before adding a new CSF-funded school site:** The agency and the district representative(s) from the proposed school should discuss and be in agreement regarding the nature of the identified services to be added. If similar services are already in place by another provider at the same site, all involved parties should clarify the need for additional services and ensure that the addition of services is not a duplication.
Note: There may be circumstances where demand for services dictates that multiple providers serve the same school. However, all parties must agree and verify that the need is quantifiable, and that the existing agency does not have the capacity to meet the additional identified need.
- **Before terminating services at a current CSF-funded school site:** The agency and the district representative(s) from the proposed school should discuss and be in agreement regarding the nature of the identified services to be removed.
- **Before reducing services at a current CSF-funded school site as a result of adding a different CSF-funded school site:** The agency and the district representative(s) from the proposed school should discuss and be in agreement regarding the nature of the identified services to be removed.
- After these steps have been completed, the agency submits this site change form by emailing it to their assigned CSF program officer. CSF will review the form and if necessary, ask for additional information. Please allow up to 10 business days for CSF staff to review and communicate the site change confirmation to the funded partner.
